WE ARE FIELD PROVEN

TITAN IMPLEMENT manufactures over 600 different implements and attachments that will work as hard as you do. Our agricultural equipment is designed to exceed your expectations and provide you with the best value-for-cost.

OUR MISSION is to provide the most value on the market, to unearth the best in our employees, and to excel in our field so that our customers can conquer theirs.

OUR STORY began in 2014 when Mike Turner and his son, Baily, launched a company that would take the market by storm. Their family has a history with agriculture (their family farm dates back to 1898) and they have over 35 years of experience in the manufacturing business. It's this combination that gives Titan Implement the edge against our competition, because we use what we make.

1100 SERIES CUTTER

This economically priced rotary cutter is designed for light-duty applications such as weeds, grass, and light brush up to 1” diameter. This cutter is designed to work with 10 to 45 horsepower tractors.

This cutter is a single spindle with two free-swinging blades, which reduce the shock of impact when a stationary object is contacted. A shear bolt through the input shaft protects the gearbox and driveline from damage. Standard equipment includes driveline shields and clutch shields. Front and rear chain discharge shields are optional.

1200 SERIES CUTTER

These rotary cutters are designed for standard-duty applications such as weeds, grass, and light brush up to 1.5” diameter. These cutters are designed to work with 15 to 65 horse-power tractors, and are available in 48”, 60”, and 72” widths.

These cutters use a single spindle with two free-swinging blades, which reduce the shock of impact when a stationary object is contacted. A shear bolt through the input shaft or a slip clutch, if equipped, protects the gearbox and driveline from damage. Standard equipment includes driveline shields and clutch shields. Front and rear chain discharge shields are op-tional. Front and rear belting available for the 1206 Cutter

970 SERIES ROUNDBACK CUTTERS

The 970 Roundback Rotary Cutter is the most robust unit in our complete line of rotary cutters. With an 84” cutting width, this unit works well with 60 horsepower and larger tractors. The 970 provides the cutting power to slash its way through heavy brush and small trees up to 4” diameter.

The 970 is perfect for maintaining the farm or the roadside. The smooth top deck design prevents build-up of debris or other cuttings and makes cleanup fast and easy. The free swinging blades, heavy-duty stump jumper, and slip clutch protects the gearbox and the driveline from damage. The dual wheels tend to keep the blades from cutting onto the ground on uneven terrain with mounds, low lying areas, ridges, or cuts.
